TOUCH SCREEN KIOSK

KM-04

Kiosk is an interactive system designed for public convenience that automates a set of functions to save time, efforts, energy and resources. Kiosks can house an application that may serve a single utility/function or multi utilities/functions. It is useful for instant information retrieval or for executing a given service or transaction without involving a human resource. Some of the instances for which kiosks are used on routine basis are for retail or cash transaction, flight/train information, web surfing, emailing, viewing of multimedia files, presentations, slide shows, video games, images etc. Kiosks can be installed at any convenient public place where people can have access to pre-planned products/services/information doing self-service. Kiosk can generally be spotted at retail stores, airports, libraries, banks, railway stations, cafeterias, shopping malls or at many other designated place.

Edu Assessment represents the next generation self-service/information kiosks with its KM Series. Armed with powerful architecture, capable of running full screen video, playing stereo audio, scanning barcodes and displaying stunning images on its best colour resolution. Our Kiosks are ready to install and use with any ERP or application system without any hassles.
